

1. Flashy content

Note.

The formatting proposed here is the default one, but others are possible by changing the theme: see the gallery of use cases in the appendix page ?? . As for the icons, they are obtained via the `fontawesome5` package, and the `\tdocicon` macro manages the spacing in relation to the text.^a

^aFor example, `\fbox{\tdocicon{faBed}{Fatigued}}` produces  Fatigued .

    \item Point 1.
    \item Point 2.
  \end{enumerate}
