

## 1. By importing the $\LaTeX$ code

To obtain renderings by importing the code from an external file, instead of typing it, simply use the `\tdocshowcaseinput` macro whose option uses the syntax of that of `\begin{tdocshowcase}` ... `\end{tdocshowcase}` and the mandatory argument corresponds to the path of the file.

**Example.** *The following was obtained via `\tdocshowcaseinput{external.tex}`.*

*Start of the real output*

*Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...*

*End of the real output*

*As for `\tdocshowcaseinput[color = orange]{external.tex}` , this will produce the colour change shown below.*

*Start of the real output*

*Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...*

*End of the real output*
