

1 By importing the \LaTeX code

To obtain renderings by importing the code from an external file, simply use the `\tdocshowcaseinput` macro whose option uses the syntax of that of `\begin{tdocshowcase}...\end{tdocshowcase}` and the mandatory argument corresponds to the path of the file.

Example .1. *The following was obtained via `\tdocshowcaseinput{external.tex}`.*

Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...

As for `\tdocshowcaseinput[col-stripe = red, col-text = orange!75!black]{external.tex}`, this will produce the color change shown below.

Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...
