

## 1. Flashy content

### Note.

*The formatting proposed here is the default one, but others are possible by changing the theme: see the gallery of use cases in the appendix page ?? . As for the icons, they are obtained via the `fontawesome5` package, and the `\tdocicon` macro manages the spacing in relation to the text.<sup>a</sup>*

<sup>a</sup>For example, `\fbox{\tdocicon{faBed}{Fatigued}}` produces  Fatigued .
