

# The theme "draft"

## I. Links

A very large link, but at least you can see it.

## II. Highlight, version and date

### 1. tdocexa, tdocrem

1.7.0  
2024-12-04

In the flow of the text, it is always useful to be able to indicate examples and comments to supplement the main content.

**Example II.1.** *What to say <sup>1</sup>? I don't know, but it's nice. No ?*

**Remark II.2.** *What to say <sup>2</sup>? I don't know, but it's nice. No ?*

1.7.0  
2024-12-04

In the flow of the text, it is always useful to be able to indicate examples and comments to supplement the main content.

### 2. tdocnote, tdoctip...

Depending on the context of use, it is sometimes necessary to be able to highlight content by indicating its degree of importance.

**Note II.3.** *What to say <sup>3</sup>? I don't know, but it's nice. No ?*

**Tip II.4.** *What to say <sup>4</sup>? I don't know, but it's nice. No ?*

**Important II.5.** *What to say <sup>5</sup>? I don't know, but it's nice. No ?*

**Caution II.6.** *What to say <sup>6</sup>? I don't know, but it's nice. No ?*

**Warning II.7.** *What to say <sup>7</sup>? I don't know, but it's nice. No ?*

### 3. tdocbreak, tdocfix...

1.7.0  
2024-12-04

In the flow of the text, it is always useful to be able to indicate examples and comments to supplement the main content.

### III. LaTeX codes

Typing an inline code such as `E = m c^2 \neq \pi \neq \frac{3}{14}` is useful, as is demonstrating use cases such as the following one.

Seeing `\LaTeX\` code formatted is nice:  $E = m c^2$  or  $\pi \neq \frac{3}{14}$ .

---

Seeing `LATEX` code formatted is nice:  $E = mc^2$  or  $\pi \neq \frac{3}{14}$ .

There's also a less intrusive side-by-side mode. Nice! No ?

Seeing `\LaTeX\` code formatted is nice: `\$E = m c^2$ or  $\pi \neq \frac{3}{14}$` .

Seeing `LATEX` code formatted is nice:  
 $E = mc^2$  or  $\pi \neq \frac{3}{14}$ .
