

a. Some remarks

Everything happens via `\begin{tdocrem}...\end{tdocrem}`, which works identically to the `tdocexa` environment, as shown in the following example.

<pre>\begin{tdocrem} Just one remark... \end{tdocrem} \begin{tdocrem} Another? \end{tdocrem} \begin{tdocrem}[Small title] Useful? \end{tdocrem}</pre>	<p>Remark .1. <i>Just one remark...</i></p> <p>Remark .2. <i>Another?</i></p> <p>Remark .3 (Small title). <i>Useful?</i></p>
