Abstract

The `tutodoc` class¹ is used by its author to semantically produce documentation of L^AT_EX packages and classes in a tutorial style² using a sober rendering for reading on screen.

Remark : *this documentation is also available in «DOC-LANGS».*

¹The name comes from “*tuto·rial-type doc·umentation*”.

²The idea is to produce an efficient PDF file that can be browsed for one-off needs. This is generally what is expected of coding documentation.
