

## 1. By importing the $\LaTeX$ code

To obtain renderings by importing the code from an external file, instead of typing it, simply use the `\tdocshowcaseinput` macro whose option uses the syntax of that of `\begin{tdocshowcase}...` `\end{tdocshowcase}` and the mandatory argument corresponds to the path of the file.

**Example.** The following was obtained via `\tdocshowcaseinput{external.tex}`.

————— *Start of the real output* —————  
*Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...*  
————— *End of the real output* —————

As for `\tdocshowcaseinput[color = orange]{external.tex}`, this will produce the colour change shown below.

————— *Start of the real output* —————  
*Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...*  
————— *End of the real output* —————
