

## 1. The what and the when

The optional keys `col`, `date` and `version` allow to date and version a change of a particular type.<sup>1</sup> Here are some examples of use.

```
\begin{tdoctech}[col = red,
                 date = 2024-10-29]
  \item Info 1...
  \item Info 2...
\end{tdoctech}

\begin{tdocupdate}[col = ForestGreen,
                  version = 1.2.3]
  \item Info 1...
  \item Info 2...
\end{tdocupdate}

\begin{tdocfix}[date = 2025-11-30,
               version = 4.5.6]
  \item Info 1...
  \item Info 2...
\end{tdocfix}
```

This gives :
