

## i. Some remarks

Everything happens via `\begin{tdocrem}...\end{tdocrem}`, which works identically to the `tdocexa` environment, as shown in the following example.

```
\begin{tdocrem}
  Just one remark...
\end{tdocrem}

\begin{tdocrem}
  Another?
\end{tdocrem}

\begin{tdocrem}[Mini title]
  Useful?
\end{tdocrem}
```

**Remark .1.** *Just one remark...*

**Remark .2.** *Another?*

**Remark .3** (Mini title). *Useful?*
