

NEW.

- Change log : two new environments.
 1. `\begin{tdocbreak} ... \end{tdocbreak}` for breaking changes which are not backward compatible.
 2. `\begin{tdocprob} ... \end{tdocprob}` for identified problems.
- `\tdocinlatex`: a light yellow is used as the background color.

FIX.

- `\tdocenv`: spacing is now correct, even if the `babel` package is not loaded with the French language.
- `\begin{tdocshowcase}[nostripe] ... \end{tdocshowcase}`: page breaks around “*framing*” lines should be rare from now on.
