

TECHNICAL INFORMATION.

- Version 3 of `minted` is taken into account.

BREAK.

- The `tutodoc` class replaces the now-defunct `tutodoc` package (for the moment, the young class offers no specific options).
- The `\tdocruler` macro is now used via `\tdocruler[<color>]{<text>}` (remember that the old syntax was `\tdocruler{<text>}{<color>}`).

NEW.

- The class is usable in Spanish.
- The documentation contains a new section explaining how to contribute.

FIX.

- The `\tdocdate` macro did not handle date format and formatting.
- Colored frames did not color text after a page break.
