P BREAK.

- The showcase environment and its descendants: the color key has been renamed colstripe.
- The macro \tdoclinkcolor has been renamed tutodoc@link@color for internal use.

NEW.

- The theme class option allows you to choose different formatting themes.
- Change log: addition of the tdoctech environment for technical information.
- The showcase environment and its descendants: the coltext key can also be used to change the text color.
- The new functionalities have been documented.

Z UPDATE.

Change log: the tdocupdate environment uses the icon $\[\mathcal{Z} \]$ instead of $\[\mathcal{Z} \]$.

Fix.

• The Spanish translations were not included in the previous version! Don't laugh too hard...
