I. Highlighting content

> **ⓘ Note.**
>
> *The environments presented in this section[a] add a short title indicating the type of information provided. This short text will always be translated into the language detected by the `tutodoc` class.*
>
> ――――――――――
> [a]The formatting comes from the `keytheorems` package.

1. Content in the reading flow

> **✎ Important.**
>
> *All the environments presented in this section share the same counter, which will be reset to zero as soon* `\section` *is used.*

a. Examples

Numbered examples are indicated via `\begin{tdocexa} ...\end{tdocexa}`, which offers an optional argument for adding a small title. Here are two possible uses.

```
\begin{tdocexa}
    An example...
\end{tdocexa}

\begin{tdocexa}[Small title]
    Useful?
\end{tdocexa}
```

Example I.1. *An example...*

Example I.2 (Small title). *Useful?*

> **💡 Tip.**
>
> *It can sometimes be useful to return to the line at the start of the content. The code below shows how to proceed (this trick also applies to the* `tdocrem` *environment presented next). Note in passing that the numbering follows that of the previous example as desired.*

```
\begin{tdocexa}
    \leavevmode
    \begin{enumerate}
        \item Point 1.

        \item Point 2.
    \end{enumerate}
\end{tdocexa}
```

Example I.3.

　　1. *Point 1.*

　　2. *Point 2.*
