⅁ Break.

- The `tdoccaution` environment has been renamed `tdoccaut` for simplified input.
- Content highlighting: examples and remarks, indicated via the `tdocexa` and `tdocrem` environments, are always numbered using a common counter.
- The unused macro `\tdocxspace` has been deleted.

❖ New.

- Change log: the `\tdocstartproj` macro is used to manage the case of the first public version.
- Code factorization: the `\tdocicon` macro is responsible for adding icons in front of text.

⟳ Update.

- Colors: the `\tdocdarkcolor` and `\tdoclightcolor` macros offer an optional argument.

  1. `\tdocdarkcolor`: the amount of color in relation to black can be optionally defined.
  2. `\tdoclightcolor`: the transparency rate can be optionally defined.

- Content highlighting: reduced space around content in colored frames.
- Versioning: better vertical spacing thanks to `\vphantom`.
