1 The what and the when

The optional keys `col`, `date` and `version` allow to date and version a change of a particular type. Here are some examples of use.

```
\begin{tdoctech}[date      = 2024-10-29,
                 col-chges = red]
    \item Info...
\end{tdoctech}

\begin{tdocupdate}[version   = 1.2.3,
                   col-chges = ForestGreen,
                   col       = ForestGreen]
    \item Info...
\end{tdocupdate}

\begin{tdoctopic}{To hide}<\faEyeSlash>%
                 [version = 4.5.6,
                  date    = 2025-11-30]
    \item Info...
\end{tdoctopic}
```
