The `tutodoc` package [1] is used by its author to semantically produce documentation of LaTeX packages and classes in a tutorial style [2], and with a sober rendering for reading on screen.

Two important points to note.

- This package imposes a formatting style. In the not-too-distant future, `tutodoc` will probably be split into a class and a package.

- This documentation is also available in French.

---

[1] The name comes from "*tuto·rial-type doc·umentation*".

[2] The idea is to produce an efficient `PDF` file that can be browsed for one-off needs. This is generally what is expected of coding documentation.
