1. By importing the LaTeX code

To obtain renderings by importing the code from an external file, instead of typing it, simply use the `\tdocshowcaseinput` macro whose option uses the syntax of that of `\begin{tdocshowcase}` ... `\end{tdocshowcase}` and the mandatory argument corresponds to the path of the file.

Example. *The following was obtained via* `\tdocshowcaseinput{external.tex}`.

━━━━━━━ *Start of the real output* ━━━━━━━

Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...

━━━━━━━ *End of the real output* ━━━━━━━

As for `\tdocshowcaseinput[color = orange]{external.tex}`, *this will produce the colour change shown below.*

━━━━━━━ *Start of the real output* ━━━━━━━

Blablobli, blablobli, blablobli, blablobli, blablobli, blablobli...

━━━━━━━ *End of the real output* ━━━━━━━
